

NOTICE

Dates of work to be performed are: _____

Hours of work are between 8 AM – 5 PM

TRAFFIC ON YOUR STREET WILL BE RESTRICTED

Intermountain Slurry Seal will be placing a slurry seal on your street. If your street is not completed on the dates indicated above, you will be re-notified with the next available date & time to complete your roadway.

Slurry seal is a combination of emulsified asphalt and aggregate that are mixed together and placed over the existing asphalt surface. This product is designed to protect and preserve the existing asphalt surface and prolong its integrity. The treatment, once applied to your roadway can take three to four hours to properly cure and receive traffic of any kind. **This product requires that your street be closed and restricted to traffic during its application. Trash, recycling, and green waste collection will not be impacted. Please place your bins on the street as usual.**

Streets that are to receive this treatment will also have “**No Parking**” signs placed along the street at least **24 HOURS** prior to the work being started. These signs will have specific dates and times that, all parking and traffic on the street will be restricted. Please look for these on your roadway.

Expect some delays and choose alternate routes if possible. Access to driveways **WILL NOT** be allowed between **8 AM – 5 PM**. Parking will be available on a nearby street. Visit the City website <https://www.happyvalleyor.gov/construction-projects/> for more information on where there is available parking. Please park on these roads if vehicular access is needed during the hours of work.

PLEASE NOTE THAT ANY VEHICLES PARKED WITHIN THE POSTED AREA ON THE DAYS OF THE STREET RESURFACING WILL BE TOWED

Avoid the construction area, as the oil used in the surface treatment will stain carpets, floors, and other items. Accidental stains can be cleaned with dish soap and water or a citrus solvent type cleaner. **Please turn off any watering of lawns during these hours, as water run-off will disrupt the curing process.**

In case of extreme hardship due to the construction, please contact the Contractor below. Thank you.
